## Return to Throwing Program for Baseball

The object of the throwing program is to return the athlete to his previous level of competition, while minimizing the risk of re-injury. Adequate warm-up and stretching, involving the whole body, attention to proper mechanics, and a gradual progression are keys to an effective recovery.

### Prerequisites

Before entering the throwing program the athlete should have achieved the following:

- 1) Full pain free range of motion of the shoulder and elbow
- 2) Synchrony of shoulder and scapulothoracic (shoulder blade) motion
- 3) Adequate strength development as determined by your physician, physical therapist, and/or athletic trainer.

### Rate of Progression

Close supervision of the program is essential. Each athlete will progress at his own rate. Mild soreness and stiffness is to be expected, however if any pain is felt in the shoulder or elbow, throwing should be stopped until pain free. The athlete is not allowed to progress to the next phase unless he can complete the previous phase pain free.

### Warm Up and Stretching

The athlete should begin each session with jogging or other light activity to increase circulation and muscle temperature. This should be followed by stretching for the full body, including legs, trunk, shoulder, and arm prior to beginning the warm up throws.

### Mechanics

Proper mechanics of throwing is essential in reducing stress and injury. The athlete's coach should be enlisted to aid in achieving a normal and consistent throwing motion. The crow-hop method may be used to assure proper alignment of the body to begin the throwing motion. **The ball should be thrown just hard enough to reach the target.**

### Variations

- 1) Mirror throwing
- 2) Frequency
- 3) Count throws
- 4) Intervals
- 5) Adapt to other sports

## Sample Progression

Begin with warm up and stretching as described on the first sheet. Do 5 minutes of easy warm up throwing at about 30 feet and then gradually move back to the prescribed distance. You can throw 2 days in a row or every other day. Plan this around your practice schedule and weather forecast for the upcoming week. Rest on any day that persistent soreness or pain in the shoulder or elbow is present. Once at 90 feet and beyond, return to 60 feet for the last 5 minutes of throwing if you are a pitcher. This will give you extra practice at locating your throws and hitting targets.

Day 1	Throw 45'	10 minutes
Day 2	REST	
Day 3	Throw 45'	15 minutes
Day 4	REST	
Day 5	Throw 60'	15 minutes
Day 6	REST	
Day 7	Throw 60'	15-20 minutes
Day 8	REST	
Day 9	Throw 90'	15 minutes
Day 10	REST	
Day 11	Throw 90'	15-20 minutes
Day 12	REST	
Day 13	Throw 120'	15 minutes
Day 14	REST	
Day 15	Throw 120'	15-20 minutes
Day 16	REST	
Day 17	Begin making throws from position or begin mound routine (next page) at 50% effort.	

## Mound Progression

After the athlete is able to throw 120 feet for 15-20 minutes without pain, specific position drills may begin. Pitchers begin throwing fastballs only at 50% effort from the mound. Position players may throw in drills starting at 50% effort. Sample progressions follow. **Use interval throwing to 120 feet as warm up. If you are not old enough to throw breaking balls then substitute with change ups.**

### Pitchers

Day 1	Interval throwing to 120 feet as warm up.	50% FB only – 25 throws
Day 2	OFF	
Day 3	Interval throwing to 120 feet as warm up.	50% FB only – 35 throws
Day 4	OFF	
Day 5	Interval throwing to 120 feet as warm up.	75% FB only – 35 throws
Day 6	OFF	
Day 7	Interval throwing to 120 feet as warm up.	75% FB only – 50 throws
Day 8	OFF	
Day 9	Interval throwing to 120 feet as warm up.	75% FB – 40 throws; 50% BB – 20 throws
Day 10	OFF	
Day 11	Interval throwing to 120 feet as warm up.	90% FB – 30 throws; 75% BB – 20 throws
Day 12	OFF	
Day 13	Interval throwing to 120 feet as warm up.	95% FB – 30 throws; 95% BB – 20 throws
Day 14	OFF	
Day 15	Simulated Game – 2-3 innings	
Day 16	5-10 minutes interval throwing to 90 feet	
Day 17	Simulated Game – 2-3 innings	
Day 18	5-10 minutes interval throwing to 90 feet	
Day 19	OFF	
Day 20	Live scrimmage	
Day 21	5-10 minutes interval throwing to 90 feet	
Day 22	OFF	
Day 23	Released for competition	

### Fielders – Start with 25 throws and work up 30-40 throws

Day 1	50% effort	Day 10	95%
Day 2	50%	Day 11	95%
Day 3	OFF	Day 12	OFF

Day 4 75%  
Day 5 75%  
Day 6 OFF  
Day 7 90%  
Day 8 90%  
Day 9 OFF

Day 13 Live Scrimmage (95%)  
Day 14 Released for competition
